Skills, Interests, & Hobbies

Proficient with

Java, C#, React, HTML, CSS, JavaScript, Git, Major Data Structures, NodeJS, Python, Docker, Adobe Photoshop & Illustrator.

Familiar with

Swift, Flutter, API Development, Google Analytics, Firebase, Jekyll, Angular, SQL, Unix/Linux OS & MacOS.

Experience

BoomTown / Software Engineer Intern

MAY 2022 - AUGUST 2022 AIKEN SC

BoomTown gave me more experience working on professional software development by introducing back-end frameworks and tools to help work on tickets dealing with integrations. I mainly used C#, SQL, Docker, and a little bit of React during my internship. My team also helped introduce AWS to me, so I can run my tickets on a test server and eventually push them to production.

Education

University of South Carolina Aiken / Candidate for B.S in Applied Computer Science

AUGUST 2020 - PRESENT, AIKEN SC

I am currently enrolled at USCA majoring in computer science with a concentration in Applied Computer Science. With my pursuit of an applied computer science degree, I have become familiar with a lot of important developmental tools and languages such as Java, HTML, CSS, Git, NodeJS, Firebase, Jekyll, Git, JavaScript, Python, and much more.

Projects

Website for an esports team / Lead HTML and CSS developer

AUGUST 2021 - December 2021, AIKEN SC

For my final project, in my fall web development class, my team and I built and developed a website for an esports team. For the website, I made a highlighted youtube reel detailing clips, provided a responsive contact form made with JS, and designed a sleek modern frontend to truly capture the website's viewer. To make the website my team used HTML, CSS, JS, Git, Bootstrap, JQuery, Photoshop, and Firebase.
